

Introduction to IFR with the G1000

Have you dreamt how it will be to let the plane fly itself through clouds? How you can fly an approach to minimums without touching the yoke? Garmin's G1000 suite is a popular glass cockpit choice that makes this easy, as long as you press the right buttons. This seminar will introduce IFR operations in the G1000 using the GFC 700 flight director and autopilot. We will discuss departures, arrivals, approaches, and other relevant functionality.

Directions: The seminar will be held in the conference room in KHWD's administration building (new terminal building) next to the FAA tower. Once inside, look for signs for the conference room. To fly in just park at transient parking. Further directions: <https://www.hayward-ca.gov/airport/contact-us>

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
