

FAASTeam presents:

Are Drones a Threat to Your Next Flight? (Seminar)

We have heard plenty of hype lately about the threats that drone activities pose to commercial air travel. But what is the reality? Are drones a legitimate risk to the traveling public, or are they just an easy target during a slow news cycle? In this webinar, we will look at the facts surrounding commercial air travel, drone regulations, and safety data, as well as research on drone sightings and actual flight behavior to understand the threat profile of drones in the national airspace.

We will also look at countermeasures to mitigate threats. At the end of this webinar, you will understand the real risks to commercial aviation associated with drones, and the real ways we can reduce that risk.

The 60-minute complimentary session will conclude with a moderated live Question and Answer period.

Directions: The San Francisco Bay Area Campus of Embry-Riddle Aeronautical University is located on the 8th Floor of the Airport Corporate Centre. There is ample secured parking on the building property outside. Walk into the building and take the elevator to the 8th Floor. It is advised that all attendees arrive on time.

This Seminar is also available for attendance online as a Webinar. Please search for this same event under Webinars in SPANS (<https://www.faasafety.gov/SPANS/events/EventList.aspx>)
