

FAASTeam presents:

What Happens Next When You Land Off Airport?

This seminar will examine what happens from the time you land off airport until rescuers find you. We will discuss what affects response times, ELT technologies and malfunctions, terrain considerations for off airport landings, and other relevant topics that affect both the probability that you will be found as well as how quickly. We will also discuss and cover how to prepare before you fly for that possibility of having to survive until you are found. This seminar will include a simulated off-airport landing experience. It is recommended all attendees bring their flight bags to the seminar. Please, don't miss this event!

Directions: The seminar will be held in the conference room in KHWD's administration building (new terminal building) next to the FAA tower. Once inside, look for signs for the conference room. To fly in just park at transient parking. Further directions: <https://www.hayward-ca.gov/airport/contact-us>
If the street side door is locked when you arrive please call the seminar coordinator to let you in.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
