FAASTeam presents:

Behind the scenes with ATC - Best practices for VFR aircraft

This will be a rare opportunity for pilots to gain insight on ATC operations, and what that translates to best practices for VFR aircraft. The discussion focuses on NorCalTRACON operations, how it is split into areas and the responsibilities of each area, traffic volume in the airspace we fly, and resulting hotspots. Come to learn valuable insight, and to ask ATC-related questions that you might had been wondering all this time.
No recording of audio or video will be allowed.

Directions: This seminar will be hosted at Civil Air Patrol at Oakland. Please park close to and use the door that doesn't face Earhart road: This is the location: https://goo.gl/maps/km3Dt8DawNn4Whgp9
Once inside the building, there will be directions to the seminar room.
To fly in, please call Signature or Kaiser air in advance. There is a 15 minute or so walk from Signature and you'll have to make arrangements with them so they can let you in to walk to your airplane. They or this event's organizer can help with driving to the location as an alternative to walking.
