

FAASTeam presents:

Spring 2023 Pilot Proficiency Ideas and WINGS

Our 'Spring 2023 Pilot Proficiency Ideas and WINGS' Program is a mixed bag of ideas for pilots to remain proficient, competent, confident and safe in flight. Utilizing the WINGS Program for an efficient approach to proficiency will be stressed. Options of adding additional aircraft ratings will be explored by George Michelogiannakis.

Drone Pro, Werner von Stein, will discuss UAS Operations, including an update on AC 91-57C & 48 USC 44809, exceptions and requirements for registering recreational unmanned aircraft. Master Instructors' Jim McCord & Art Hayssen will touch on main concerns for brushing off the rust after a long winter of very reduced flying time due to the historic mix of high winds, repeated atmospheric rivers and snow covered runways at low elevations in the North San Francisco Bay Area.
