

EAA Chapter 663 June IMC Club Meeting

The EAA IMC Club provides a "hangar flying" experience organized around visual flight, in order to promote safety, education, and proficiency.

Every meeting consists of a scenario presentation and group discussion about unusual or interesting charts, changed rules and procedures, and member experiences.

The scenario titled "**Pressured**" describes an actual flight as follows:
In this scenario, our pilot is making a 320-mile IFR flight in a Cessna 177 Cardinal, with most of the flight expected to be in IMC. Given that this was a late afternoon departure, what additional planning should be done with respect to both your intended destination, as well as an alternate in case you need to divert?

Bring your EFB, your experience, and your questions, and be ready to participate.
