Hollywood Bowl 2014 Summer Concert Season

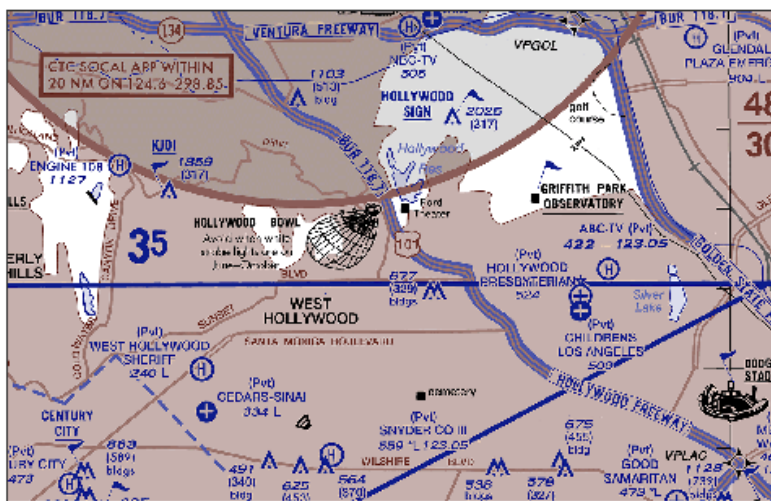

Los Angeles, CA

June 26 - October 31, 2014

Avoidance Requested during Events:

The Hollywood Bowl outdoor theatre has musical concerts and events scheduled through September 2014. These events are scheduled every day through the season and commence at 7 or 8pm nightly. In order to maintain the ambience of the concerts, pilots are requested to avoid overflying the venue area.

A white strobe will be activated atop of the concert hall to give a visual signal to aviation when a performance is taking place.

The FAA and the Los Angeles Philharmonic Association ask that pilots avoid flight over the Hollywood Bowl and John Anson Ford Amphitheatre during the summer concert season. Music concerts will be held nightly from 6 p.m. to midnight, through September 14 2014.

White searchlights and strobe lights over the outdoor Hollywood Bowl will alert pilots that a concert at the Bowl is in progress. A single strobe light will be used for marking the Ford Amphitheatre

performances except when the bowl and Ford are running music concurrently when all strobe lights will be on.

The Bowl and Ford Amphitheatre are in Cahuenga Pass, five miles southeast of Burbank-Glendale-Pasadena Airport and 15 miles north-northeast of Los Angeles International Airport. Both are near the intersections of Airways V-186, V-459 and V-201, and within a five-mile radius of Golden State (I-5) and Hollywood (U.S. 101) freeway intersections.

The FAA will modify aircraft flight patterns when possible to minimize noise for concert audiences. Announcements recommending pilots avoid flights in the vicinity of the Hollywood Bowl and Ford Amphitheatre during the summer concert series will be broadcast on the Automatic Terminal Information Service (ATIS) at airports in the Los Angeles Basin.
